

CONTIPHARMA

a member of Bedelco group

PROTECT

Particulate respirator FFP3 Purism

BRAND

PURISM

BACTERIAL FILTERING EFFICIENCY

≥ 95% (tested by gb2626-2019)

SIZE

13.8x11x5x5.2cm

SPECIFICATIONS

5-layer mask :

- non-woven PP fabric
- PP fusion blown fabric
- non-air woven fabric
- aluminum nose clamp
- nylon/polyurethane composite headband

APPLICATION

Purism FFP3 particle respirators provide effective respiratory protection for use in industries where workers will be exposed to solid particles (dust) and/or non-volatile liquid particles. Ideal for applications where a higher protective factor is required, providing protection against most gases, vapors and particles.

COMPLIANCE

CE Marking 2016/425
Standard EN 149/2001-a1/2009

CONDITIONING

20 pces / box, 20 boxes / cardboard, 400 pieces / cardboard,
Cardboard size: 67 × 28 × 36 cm - 11.7 kg

STORAGE

to be stored in a dry, clean, ventilated and non-corrosive gaseous area, away from ignition sources or combustible materials

STORAGE TIME

3 years

Wearing method

1. Hold the mask with your fingertips at the position of the nose clip to allow the headband to hang freely.
2. Put the mask around your chin with the nose clip facing upwards and wear the lower headband on the neck below the ears.
3. Put the upper headgear on the top of the head.
4. Use the index fingers of both hands to move from the middle of the nose clip to both sides and press down the nose clip until it is close to the bridge of the nose. One-handed operation is not recommended.
5. Before entering the work area, you must check the tightness of the mask and face, the inspection method is as follows:
 - a) Cover the mask with both hands, taking care not to affect the position of the mask on the face.
 - b) Take a deep breath. If you feel a leak near the bridge of the nose, adjust the nose clip again according to step 4;
 - c) If the leak is on the edge of the mask, the headgear should be readjusted.

Warning! If the mask and face cannot be in close contact, do not enter the work area. Please contact your supervisor.

Removal method

Referring to step 2 of the wearing method, hold the protective mask with one hand to maintain the wearing position, and use the other hand to pull down the headband and pull it over the top of the head. Continue to hold the mask with your hand, then pull the headband over the top of your head and remove the mask.

Restrictions on use

1. This mask does not generate oxygen and cannot be used in environments where the oxygen content is below 19.5%.
2. It cannot be used in an environment that momentarily endangers life and health.
3. It cannot be used in an environment where the pollution concentration or content exceeds the maximum concentration prescribed by the government or the allowable exposure concentration value is 10 times.
4. Cannot be used in environments where the concentration of oily particulate matter or organic vapor exceeds occupational limits.
5. Please do not change, wash, abuse or misuse this protective mask.
6. Do not use beards or other facial hair or conditions that impede a good seal between the face and the sealing surface of the protective mask.
7. This mask is designed for occupational protective equipment, and the user should be an adult who has received training in proper use methods and understands the restrictions on use. This mask is not designed for children.

Period of Validity: 3 years
Production Date/Batch Number: Showing on the Packaging

Precautions

1. This product is only used for breathing protection against certain particulate matter. Misuse of protective masks will reduce its effectiveness and may cause disease or permanent damage to health or even death.
2. Before use, you should receive training on the correct method of use and follow the relevant safety and health standards.
3. Please carefully check whether all parts of the protective mask are intact before use. If damage occurs, the mask should be discarded or replaced.
4. This product is a disposable protective mask. When the mask is damaged during use or the breathing resistance is too high, be sure to replace the mask.
5. Use within the limits of applicable government regulations.
6. Leave the work area immediately if:
 - a) Feeling difficult to breathe;
 - b) Feeling sick and other discomforts.

[Storage conditions]

This product should be stored in a well-ventilated, dark and dry environment. Keep away from fire, pollutants and possible pollution.
Storage temperature range: -20°C to 38°C; storage humidity: <80% relative humidity. When transporting this product use original packaging provided.

-20°C 38°C <80% RH See information supplied by the manufacturer Do not re-use
